

TEK Testimonial

ZUCE'S TEKTRAINING OPTMISES PERFORMANCE OF BRISBANE WORKSHOP

Simply Tuning, a dyno tuning specialist workshop in Brisbane's north, tunes a wide range of vehicles, from common rail diesels to luxury high-end automobiles. Head Technician, Daniel Buchner, had previous experience of other tuning software, so when establishing Simply Tuning, he chose ZUCE to ensure he could offer his customers the very best tuning performance possible - Alientech. Knowing the reputation of both ZUCE and its founders, Glen Hadden and Eric Ebert, Daniel knew there was no one better to take his business to the next level.

Hands-on, expert training - right here in Australia

Daniel found ZUCE's TEKTraining to be invaluable in building his tuning expertise. The easy-to-follow sessions embedded theoretical information with practical learning experiences and exercises to give him a thorough grounding in all aspects of the latest Alientech technology.

After the training, Daniel took advantage of ZUCE TEKTalk so he was completely supported in his workshop. He was able to access phone support directly with the trainer, who guided him through any issues or questions on the spot.

Evolved performance

ZUCE's TEKTraining has had a substantial impact on Simply Tuning's productivity and business performance. Daniel's tuning mastery means he is faster, more accurate and more responsive to his customers' specific needs. The workshop is now able to tune more vehicles each day, and servicing more customers than ever before.

**SINCE COMPLETING
TEKTRAINING,
SIMPLY TUNING
HAS SEEN A 300%
INCREASE IN
PRODUCTIVITY.**

"There's simply no other company in Australia that knows half of what ZUCE knows about Alientech. I'm putting what I've learned from ZUCE into practice every single day. My confidence with tuning all types of vehicles has sky-rocketed and I'm doing things right the first time. I'm 10 times faster than before and that translates into a huge financial improvement for my business."

DANIEL BUCHNER

Head Technician – Simply Tuning
